XM Radio is the best thing that has happened in radio in a long time. The content is so much better than what is otherwise available. Importantly, the traffic and weather are so much more useful than the am radio stations. I hate to wait through 9.5 minutes of blather to get the 30 seconds I need. Often, the traffic information on am is too late to use, i.e. I have missed the turn to avoid the problem. XM's is better. It's a public service, not entertainment. I wish everyone had it....it would really reduce congestion.
